## The future of Software Testing

November 2009, Exeter: TCL awards three scholarships to UCL

TCL announces the award of three scholarships to UCL Undergraduates in Computer Science. Each of the successful entrants to the TCL 2009/10 programme will receive £2000.

"The scholarship programme has helped some incredible people; who I hope will go on to make valuable contributions to software development and testing. It is a great pleasure to support the programme, and to work with such talent, and world leading organisations like Exeter, UCL and Boston Universities."

Stewart Noakes  
Chairman and Co-founder, TCL Group Ltd

The role of the scholarship program is to strengthen TCLs links with its partner universities carefully selected for their academic excellence. UCL is a top 5 UK university as ranked by the Times Online guide for higher education and became part of the scholarship programme for the first time this year.

"My sincere thanks to all at TCL - this is an excellent partnership"

Anthony Finkelstein  
Professor of Software Systems Engineering and  
Head of Department for Computer Science, UCL

The scholarship winners will also get the opportunity to apply for an international internship programme, which will take place over summer 2010. For the first time this programme will take place in Bangalore at the TCL offices.

TCL works with its academic partners to develop innovation and share knowledge in the field of Software Testing. This is done through a mixture of events and programmes including internships, Shell Step schemes, knowledge transfer, CandI projects and Zappers events.

TCL is an independent Software Testing Consultancy, started at the beginning of 2000, with offices in the UK in London, Bristol and Exeter; in Burlington, Massachusetts in the US; and in Bangalore in India.
